

OCS SERIES LOCKS

QUALITY + CHOICE

The OCS Series of electronic locker locks share the same quality pedigree, form and fit. The OCS®Pro sets the standard for touch keypad electronic locks and the OCS®SMART further elevates this and the ability to use and manage the locks with keypad or smartphone while adding significant additional features and benefits.

OCS®SMART

SPOT THE DIFFERENCE

The shape, size and fixings are identical for the OCS series of locks. The way to identify the OCS®Pro and OCS®SMART are by the detail on the raised, domed, connection indicator on the front of the lock.

FEATURE COMPARISON

The OCS®Pro and OCS®SMART share many of the advanced design features:

OCS®PRO

OCS®SMART

2 User Modes

Keyless Operation

ADA Compliant

Sturdy Construction

Antibacterial + Antiviral

Wet Area Compatible

Easy Lock Retrofit

The OCS®SMART with its BLE or keypad operation makes operating and managing electronic locker locks not only easier but adds significant benefits to the manager and user alike over the OCS®Pro:

OCS®SMART KEY MANAGER BENEFITS

Program or update locks via maintenance App individually or by batch	✗	✓
Assign digital master keys remotely to authorized managers to operate locks	✗	✓
Get immediate audit on lock activity and status	✗	✓
Convenient real-time lock battery status	✗	✓
Set locks to be user operated (open/closed) by keypad or mobile device	✗	✓
Eliminates need to purchase additional E-Keys to manage locks	✗	✓
Simple integration – No complicated software	✗	✓
SDK available (optional) – Integrate with clients existing facility App if required	✗	✓
Usage data reports – Check lock usage profiles	✗	✓

Key User Benefits will save significant management time as commonly support is required when Users "forget" locker number or user code:

OCS®SMART KEY USER BENEFITS

Never forget locker number – Stored on Users mobile device when locker selected	✗	✓
Never need to remember code – Mobile device when paired with lock will open lock with stored digital code	✗	✓
